### **The outcome of your work capability assessment**

Based on the outcome of your Work Capability Assessment made on your Employment and Support Allowance claim and after your appeal on 08/08/2017, you have been awarded limited capability for work and work related activity.

This has been transferred from the ESA claim to your Universal Credit claim from 31/10/2016. The additional element is payable because you have a health condition or disability that affects your ability to carry out certain functions, which in turn limits your capability for work and work related activity.

Details will be sent to you separately about the arrears due.

This means that you will be placed in the no work requirement group.

As you have limited capability for work and work related activity you have been awarded the Limited Capability for Work and Work Related Activity element of Universal Credit.

You no longer need to send us medical statements or Statement of Fitness for work from your medical practitioner or GP at this time.

You will be reassessed on 08/08/2019. We will contact you closer to this date to let you know what you should do.

You should let us know straightaway about any changes to your health condition or disability as this can affect your claim.

### **How we collect and use information**
